Odense, den 21.03.00.

Regarding fire in fryer in Kongensgade, Odense.

I have been asked by Jimco to describe the circumstances about a fire we had in our restaurant in Kongensgade, Odense.

The shortening started to smoke, we turned the fryer off, but the temperature kept raising, because of a malfunction in the fryer, and it ended with a fire.

At the end a firedepartment came and turned the fire off.

The fire reached the exhaust fan, but because the exhaust fan were clean the fire couldn't extend.

For further information don't hesitate to call.

Yours

Søren Larsen
