

SCADA SOFTWARE PACKAGE FOR MEDIUM / SMALL APPLICATIONS

Choose from options as low as 0 to 500 data points.

- ✓ **Reduced Costs**
- ✓ **Easy Implementation**
- ✓ **Real Time Data & Alarm Processing**
- ✓ **Historical Data Storage**
- ✓ **Small / Medium Sized Installations**
- ✓ **Dedicated Customer Support**

1 Choice of System Configurations

RealWin is a SCADA server product which runs on current Microsoft windows platforms. It operates on a single pc or multiple pcs connected through a TCP/IP network. It reads and returns data from field devices using drivers, stores data for historical access, runs Command Sequence Language (CSL) scripts and generates alarms as defined in the system.

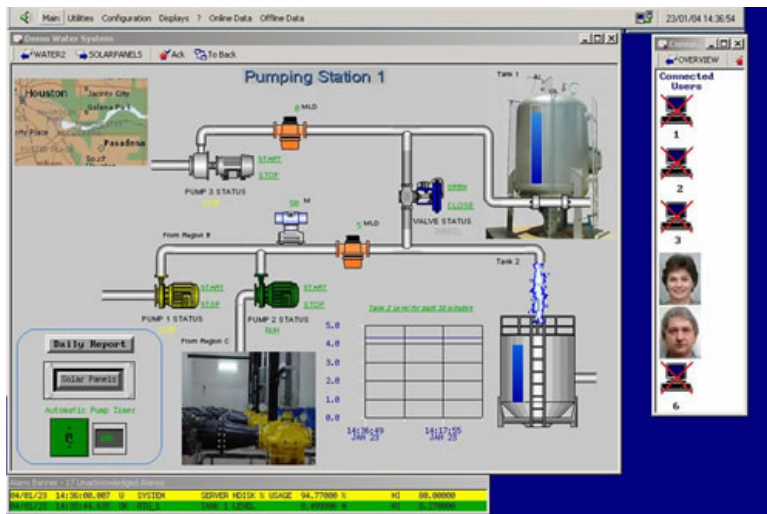

2 Sample Driver List

RealWin supports all common protocols such as:

- IEC 870-5-101
- DNP 3 Master / Slave
- Modbus Master / Slave
- IEC 870-5-104
- Allen Bradley DF1
- Many More

3 Specifications

- Up to 10,000 data points
- Runs on Microsoft Windows platform
- Up to 63 FlexWin Clients can be connected simultaneously
- Up to 63 Scanners can be connected. Scanners can run on separate PC's to RealWin
- Up to 16384 Analog Tags, 16384 Status Tags, 16384, 16384 Meter Tags and 16384 PCU's
- Real Time Data and Alarm Processing
- Database Types—Status, Analog and Meters.
- Control Processing
- Control and Information Tagging
- Manual Overwrite
- Command Sequence Language
- Superkey

Customer Support:

Utilizing the RealFlex Online Support System (ROSS) and backed up by dedicated account managers, we are committed to providing first class support, engineering services and technical expertise.

Training:

RealFlex training provides an integrated curriculum designed to promote the effective use and understanding of RealFlex products. All classes are geared towards the specific applications and interests of attendees.

FlexView

- FlexView is the HMI for the RealWin Server.
- FlexView HMI connects to the SCADA server to provide a range of configurations from a single PC up to multiple PCs, creating a multi-user system.
- Use FlexView to graphically represent and maintain plant process as a Graphical User Interface, schedule reports, build displays, create and edit databases etc.
- A copy of FlexView Development is included with RealWin

Optional Product

- FlexBase to store data in SQL format.
- FlexWeb to monitor the data on Web pages.
- Custom Development Package

About RealFlex Technologies

RealFlex software provides customers with secure SCADA software. Servicing the SCADA market worldwide since 1982, RealFlex software is used by customers in more than 40 countries.

We have a global network of channel partners and customers in all continents of the world.
